DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to a method of 3rd party payment, classified in class 705, subclass 53.
- II. Claims 33-42, drawn to a billing method, classified in class 705, subclass 34.
- III. Claims 43-56, drawn to individual payment method, classified in class 705, subclass 18.
- IV. Claims 57-60, drawn to a system for billing, classified in class 709, subclass 310.

The inventions are distinct, each from the other because:

Inventions I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of introducing people to one another. See MPEP § 806.05(d).

Inventions II and I,III,IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method of monitoring electric usage. See MPEP § 806.05(d).

Art Unit: 3627

Inventions III and I,II,IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a way to effect on-line banking. See MPEP § 806.05(d).

Inventions IV and I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as an on line gambling device. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
